

## Who We Are...

KEMRON Environmental Services, Inc. is a recognized leader in the environmental consulting, engineering and remediation services market with a national reputation for performance, innovation and partnering. In business for more than 30 years, KEMRON provides its services to various commercial and industrial clients as well as federal, state and local governments. KEMRON operates from strategic office locations throughout the country, offering a national presence with local work forces. From investigation to permitting through research, testing, engineering design and construction, KEMRON offers a single-source provider of environmental services ranging from project characterization through site closure. Comprised of a multi-disciplinary staff of professionals focused on creating value for our clients, KEMRON is dedicated to assisting our clients as they meet their ever changing environmental challenges.

## Our Mission Statement...

*“To provide exceptional quality service and innovation while remaining dedicated to the protection of our environmental future.”*

...defines KEMRON's commitment to bringing innovative solutions and exceptional quality performance to each work assignment. Whether supporting industry on complex facility-wide environmental programs, the federal government as a performance-based contractor, state and local municipalities in the design and implementation of critical cleanup programs, or identifying and returning value to impacted property for commercial and industrial property developers, KEMRON places client advocacy at the center of our service.

Professionalism and attention to detail, in all elements of project management and execution, are the hallmarks of KEMRON's service. Providing experts in regulatory negotiation, investigation of the nature and extent of contaminants, and technology evaluation for identification of the best treatment method for contaminants, results in the design and construction of remedies that meet the “best value” discrimination test. Delivering final solutions within expected time frames and budgets are outcomes clients expect when working with KEMRON.

## Why We Exceed Expectations...

KEMRON has distinguished itself in the environmental marketplace by providing performance driven solutions, offering innovative management strategies and partnering with customers to maximize benefits for our clients and business associates.

**Performance** – KEMRON defines performance as delivering quality services on time and within budget. KEMRON has redefined performance-based contracting by applying regulatory understanding and negotiation, performing aggressive investigative and engineering studies and designing cost-effective solutions for complex environmental projects. Performance based approaches have been applied to all project types, ranging from single property transactions to multi-site, multi-state complex transactions involving removal actions, groundwater remedies, long-term monitoring and engineering controls. Where savvy risk management is required to move a project to completion – KEMRON offers experienced professionals skilled in controlling and minimizing risk and bringing projects to successful closure.

**Innovation** – KEMRON defines innovation as not just staying ahead of the curve, but steering the curve in the direction of new and emerging ways of achieving environmental objectives. Utilizing the talent of KEMRON's nationally recognized technology research and development laboratory, KEMRON continues to push the traditional boundaries of remedial technology development while testing and refining proven approaches.

**Partnering** – KEMRON defines partnering as building a team of professionals with a common objective working to achieve, complete and succeed. KEMRON partners with our clients to establish trust, set a clear path to completion and facilitate direct and ongoing communication. As a minority-owned business, KEMRON offers our private sector clients a recognized and reliable environmental services company that can meet specific utilization goals. Likewise, as a small business under federal contracting, we offer an excellent teaming partner on federal procurements and a national reputation as a prime contractor on small business set aside contracts.

## What We Offer...

Offering our services and expertise throughout the country, KEMRON is structured around seven key business lines offered as stand-alone services or bundled as a complete package:

- Comprehensive Site Investigation and Engineering
- Site Remediation and Construction
- Environmental Consulting
- Environmental Site Assessments
- Emergency Response
- Technology Evaluation / Treatability Studies
- Geotechnical Testing

In addition, KEMRON offers a wide range of specialized environmental consulting and remediation services allowing a single point of contact for any environmental requirement.

- Regulatory Negotiation and Support
- Expert Witness Support
- Environmental Risk Management
- Brownfield Redevelopment
- Property Transfer Support
- Innovative and Emerging Technology Evaluation and Development
- Traditional and Performance-Based Remediation
- Pollution Prevention / Waste Minimization
- Environmental Compliance

The KEMRON logo is displayed in a bold, blue, sans-serif font. It is positioned on the right side of the page, partially overlapping a large, semi-transparent globe of the Earth. The globe shows the continents of North and South America. The background of the entire page is a bright blue sky with a field of tall green grass in the foreground, creating a natural and environmental theme.
