

UXB-KEMRON Joint Venture Awarded Worldwide Environmental Remediation Services by the US Corps of Engineers

Blacksburg, VA (DATE) – **A Joint Venture between [UXB International, Inc.](#) (UXB) and [KEMRON Environmental Services, Inc.](#) (KEMRON)** has been awarded a Worldwide Environmental Remediation Services (WERS) contract by the US Army Engineering and Support Center, Huntsville.

The indefinite-delivery/indefinite-quantity contract has services for Conventional and Recovered Chemical Warfare Material Munitions Responses and other munitions-related services at:

- Formerly Used Defense Sites (FUDS);
- active Department of Defense (DOD) installations;
- DOD Base Realignment and Closure Act (BRAC) sites;
- property adjoining DOD installations;
- other federally controlled/owned sites that have been impacted by Munitions and Explosives of Concern (MEC); and
- other munitions related operations.

Subcontractors for this contract include:

- [Concurrent Technologies Corporation](#)
- [Global Strategies Group](#)
- [JAYA Corporation](#)
- [Jacobs Engineering Group](#)

“Our goal is to return current sites where munitions are presently, or past sites which may have been formerly used for military training or operations, to nonhazardous areas,” said Rich Dugger, President and Chief Operations Officer of UXB.

“Application of innovative clean up strategies at sites throughout the world under performance based requirements will be a hallmark of this contract,” said John Dwyer, Executive Vice President of KEMRON.

[UXB-KEMRON LLC](#) is one of seven firms that were awarded a contract; which has a maximum ordering capacity of approximately \$1.1 Billion.
