

# Air Force Center for Engineering And the Environment (AFCEE)

## Worldwide Environmental Restoration and Construction Contract (WERC) LATA-KEMRON Remediation JV

This WERC contract includes environmental restoration/remediation efforts including completion of a conceptual design, construction, implementation, demolition, repair, and operation and maintenance of installed systems. The contract may include support for design or operations and maintenance incidental to environmental restoration and construction, traditional construction, and performance based remediation efforts. Task orders under this contract may involve a PBR approach, where desired outcomes of the work are identified without specifying the methods or technologies to be used. Under such efforts, the contracted work is performed with a focus on results. This approach enables the contractor to select actions best suited to the site requirements, and ensures that best management practices and best available technologies are employed. Requirements shall be carried out as specified under TOs at locations worldwide in accordance with technical and regulatory requirements. Services may include, but are not limited to, the following:

### ENVIRONMENTAL REQUIREMENTS

- Performance Based Remediation
- Completion of Conceptual Design
- Study Effort Incidental to Remedy or Corrective Action
- Pre-Final and Final Inspections
- Environmental Construction
- Operations and Maintenance
- Ordnance Removal and Support
- Presumptive and Other Remedies
