

USACE, Kansas City District

Preplaced Remedial Action Contract (PRAC)

KEMRON Environmental Services, Inc.

KEMRON was awarded a PRAC Multiple Award Task Order Contract (MATOC) for Environmental Remediation Services through the USACE Kansas City District. This contract is for hazardous, toxic and radioactive waste (HTRW) remediation projects for both civilian and military agencies of the Federal Government primarily in EPA Region 2 and the Northwest Division.

Contract Statement of Work:

This contract for environmental response actions and associated investigation, design, and removal activities will include service and construction activities mandated by the Defense Environmental Restoration Program (DERP), Superfund, Formerly Utilized Sites Remedial Action Program (FUSRAP), environmental cleanup activities under the Base Realignment and Closure (BRAC) Program, for its Army and Air Force customers, Department of Homeland Security and the Federal Emergency Management Agency (FEMA), and other environmental and homeland security laws and regulations requiring support activities for military installations, Corps' civil works projects, and work for other agencies. Services may include:

- UST identification, removal, and remediation
- Topographic and geophysical surveys
- Contaminated soil excavation and debris removal activities
- Construction of and Short Term (maximum of 5 years) Operation and Maintenance (O&M) operations of project facilities
- PCB, asbestos and lead paint removal and disposal activities
- Bioremediation of Petroleum Oil Lubricants contaminated soils
- Soil and rock borings, sampling, testing and other geotechnical analyses
- Drilling, installation and development of groundwater monitoring wells
- Hydrogeological testing and data analyses
- Multi-media sampling and sample management for chemical and geotechnical characteristics
- Work area and perimeter air monitoring, sampling and the related analysis
- Installation of support facilities (i.e., site project office, decontamination facilities, roads and utilities)
- Traditional and innovative methods for source control and remedial action
- Low level radioactive remediation
- Building Construction (residential and commercial)
- Site Restoration (public and private)
- Demolition (residential and commercial)
- Public relations including participation in community education, public involvement or public affairs activities
- Support for Department of Homeland Security and FEMA initiatives
- Planning, design, and construction of active and passive measures required for population, area and infrastructure protection
- Evaluation and utilization of sustainable practices during project execution
